

Mid-Atlantic Chapter of the Medical Library Association MAC Research Mentoring Program

Librarians often have questions about how to prepare research projects. To help you find answers and resolve problems, the MAC Research and Assessment Committee sponsors a research mentoring program to put those librarians with research experience in contact with librarians who are starting the research process. Mentors are able to provide assistance and advice upon request. If you have a research project question, find someone with expertise in that area to guide you through the process. And if you have at least 5 years' experience, consider sharing your knowledge and abilities with others. Uncertain about whom to contact? Email Virginia.Desouky@mail.wvu.edu to be connected with the right person.

Anyone can be a mentee – from student to experienced professional. The application forms identify specific mentoring opportunities and provide a space for you to suggest your own.

Need help getting started? Mentoring starter questions:
